Course Outline For: Getting the Most Out Of Your Preemergent Herbicide Application

Todd Burkdoll, BASF Tech Services

This presentation will discuss the properties of common pre-emergent herbicides used in landscape and non-crop sites. The importance of proper application timing, herbicide incorporation, rotation management and weed ID will be discussed.

Common preemergent herbicide properties such as mode of action, water solubility, soil adsorption, vapor pressure and factors affecting herbicide persistence will be discussed for various herbicide families.
